EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

This application is in condition for allowance except for the presence of claims 1-16 and 28-34 to invention 1 non-elected without traverse. Accordingly, claims 1-16 and 28-34 have been cancelled.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The prior art fails to disclose, either singly or in combination, a biasing circuit and method for an avalanche photodiode having at least one associated reference diode comprising a bias voltage generator having a first output for applying a first bias voltage to the at least one reference diode and a second output for applying a second bias voltage to the avalanche photodiode, the second bias voltage having a predetermined relationship with the first bias voltage; a detector having an input connected to the at least one reference diode; and a comparator that compares the measured operational characteristic to a reference value and that controls the bias voltage generator to adjust the first bias voltage and the second bias voltage in a manner that drives the measured operational characteristic to substantially match the reference value.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
